Forge X11

Configure it Your Way

The Forge X11 adapts to your workforce with Android 16, optional 5G connectivity, and configurable accessories for data capture, payments, and more. Build a solution around the way your team works and stay connected wherever the job takes you. Choose the capabilities you need, configure your X11, and take your workflow further.

Warehousing
Accelerate inventory management by scanning barcodes, verifying products, and tracking assets in real time to keep warehouse operations moving efficiently.

Manufacturing
Improve production efficiency by identifying parts, tracking inventory, and updating work orders directly from the manufacturing floor.

Transportation & Logistics
Keep shipments moving by scanning packages, verifying deliveries, tracking assets, and collecting payments from a single mobile device.

Hospitality & Entertainment
Deliver exceptional guest service by scanning wristbands or event credentials for fast access and identification, accepting mobile payments, and assisting guests wherever service is needed.

Distribution
Increase fulfillment accuracy by scanning products, confirming shipments, and managing inventory throughout the distribution process.

Field Service
Equip technicians to scan equipment, access service records, verify assets, and accept payments while completing jobs on-site.

Retail Operations
Create a seamless customer experience by accepting secure payments, verifying loyalty or membership cards, managing inventory, and assisting customers from anywhere in the store.

Gaming & Casinos
Enhance guest experiences by scanning player cards or event credentials, verifying access, processing mobile payments, and keeping operations running efficiently across the property.

Expand What's Possible

Transform your Forge X11 with multiple accessory options for data capture, identification, and secure payment processing. Combine capabilities like barcode scanning and NFC to build the right solution for your workflow. Reach out to your sales representative to explore your options.

NFC

Contactless Identification

Enable fast, contactless interactions by reading NFC-enabled cards, badges, tags, and devices for authentication, identification, and asset management across a variety of mobile workflows.

Barcode Scanning

Fast Data Capture

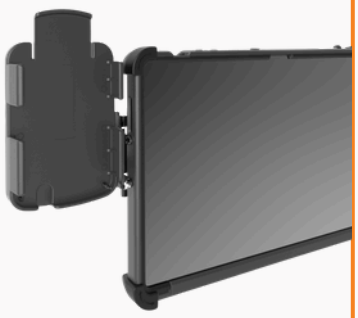

Capture 1D and 2D barcodes with speed and accuracy to simplify inventory management, shipment verification, asset tracking, and the scanning of guest wristbands, tickets, and credentials for fast identification and access.

Mobile POS & MSR

Tap. Dip. Swipe.

Accept secure payments with flexible mobile payment accessories that support the way your customers prefer to pay, helping your workforce complete transactions quickly and confidently.

Ingenico Link 2500

Secure Mobile Payments

Accept secure EMV chip, contactless, and mobile wallet payments with the Ingenico Link 2500, giving your workforce the flexibility to process transactions wherever business happens.
