support@mobiledemand.com.

1 Confirm model number of MobileDemand Tablet

- Check the label on the tablet box or MobileDemand tablet and documentation
- Refer to chart on following page to confirm the correct direct wire kit
- Determine if you will be powering a vehicle dock or plugging directly into tablet

2 Vehicle Input Voltage

Determine the correct voltage of the equipment you are wiring to:
(Forklifts, Tuggers, Pallet Jacks, HiLo's, vehicles etc)

- **12-24 volt range** – Typically utilized by LP/Gas Forklifts and vehicles
- **20-60 volt range** – Typically utilized by Electric Forklifts
- **Auto-Adapter** – Utilizes vehicles 12V DC auxiliary power outlet (cigarette lighter socket)

3 Connect Input Power

- See diagrams in this guide for all necessary parts within each kit
- Red wire or white to vehicle 12V accessory or battery (+)
- Black wire to chassis ground or battery (-)
- A ring terminal end kit with various sizes included to fit your application

4 Test

- Make sure all connections are solid
- Please use proper strain relief with all direct wire installs (Zip ties)
- Confirm it is charging the powered dock or tablet

USB Expansion Kit

Four Port USB Hub

The four port USB Expansion Hub enables users to increase productivity by allowing the connection of additional peripherals. Easily attach USB-A corded scanners, probes, scales and more. The Hub is equipped with a USB-C power delivery port, compatible with MobileDemand Direct Wire Kits with USB-C power supply.

USB-A
Gen 2 (10Gbps)

USB-C
Gen 2 (10Gbps)

USB-C
Gen 2 (10Gbps)
Power Delivery
100 Watts

Hub can rotate to accommodate a variety of tablet configurations.

Universal AMPS pattern allows various mounting applications.

Cables can be zip tied for a tight, secure fit in mobile environments.

WAREHOUSING POWERED DOCK

The forklift is the work horse of any warehouse, distribution center, or packaging company. High low, pallet jack and forklift vehicles are focused on efficiently moving inventory and push the daily limits of any device. We have designed and tested our rugged mounts to provide a precision fit while offering a rich assortment of I/O ports to support scanners and other peripherals. All docks and holders may accommodate direct power solutions from the vehicle to the tablet based on specific voltage of the vehicle.

EMERGENCY VEHICLE DASH MOUNT

Tablet mounting with mobility in mind is essential for first responders. Whether attached to the center console or dash of an ambulance, fire engine or police cruiser, interfacing with GPS maps and Cellular data to guide the team to their destination is mission critical. The snap mount provides the ability to easily remove the tablet while preserving connection to doctors or headquarters while on site. Additional mounts can be attached to walls so EMTs and other personnel can maintain vital communication during transport.

FIXED MOUNT WALLS, COUNTERS AND MORE

Fixed mounts using a VESA plate or a mobile, no drill magnetic mount allows tablets to be positioned virtually anywhere. Manufacturing utilizes magnetic mounts by affixing directly to machines to manage cycle counts and controls. Healthcare may employ a snap mount on the exam room wall or admissions area to digitize the check-in process. Restaurant or retail settings may utilize a counter top with a tablet equipped with MSR, the quick release snap mount instantly converts the tablet into a convenient mobile Point of Sale system.

NO DRILL VEHICLE MOUNT OPTIONAL KEYBOARD SUPPORT

Computers mounted in police cars, trucks, and utility vehicles traditionally required large, heavy mounts that took up much of the passenger seat area. They require intricate and sometimes invasive installation and are very expensive. A no drill floor mount, used in conjunction with MobileDemand's patented quick release snap mount system make those bulky installs a thing of the past, freeing up space and saving time. Add an optional keyboard support for processes such as email and remote communication.

Mounting Made Easy Quick Release Snap Mount System

THE SIMPLE GENIUS OF OUR PATENTED QUICK RELEASE SNAP MOUNT SYSTEM

Providing mobile industries with rugged, reliable technology is what inspired the genesis of MobileDemand. But that was only part of the equation. Realizing a growing number of industries needed the ability to safely and securely mount their devices soon became a driving force to what now sets us apart from others in the industry.

We immediately went to work and patented our extremely versatile Quick Release Snap Mount System, we've been expanding our expertise ever since.

When it comes to mounting, we *are* the experts.

A - Snap Plate

Every MobileDemand xTablet is securely affixed with our universal snap plate, allowing users to custom configure a mounting solution best designed to fit their exact needs.

B - Snap Rail

Engineered to slide and snap securely onto the snap plate receiver. Four hole pattern accommodates universal RAM mount products, allowing a vast array of mounting possibilities.

C - Snap Release

Quickly transition tablet from mounted to mobile applications and vice versa with a simple press of the snap release. Anti-theft lock and key design also available for those needing a safe and secure solution.

D - RAM Compatible

Designed to work with the extremely versatile RAM components provides virtually limitless rugged mounting solutions in any environment.

Direct Wire Kit Table

Click part number for list of components and instructions for each Direct Wire Kit.

STEP 1

Choose device to be powered.

STEP 2

Select if power source is auxiliary power outlet.

STEP 3

Select if tablet or powered dock will be wired directly to a power source.
Determine input voltage and select corresponding direct wire kit.
