STEP-BY-STEP

Follow these easy steps to get up and running with the app that's right for your business.

xPIM	xPIM+	xDIM
1. Download the App Click the link below or search for "xPIM" in the App Store or Google Play. (Supports both iOS and Android) xPIM Application Download 2. Create Your Account Get started in seconds—just enter your info or company organization, add users, and you're ready to roll. No lengthy onboarding, no hassle. 3. Start Capturing Data Anywhere Open the app and begin capturing barcodes, photos, weight, and other product details—right from the warehouse floor, retail backroom, or wherever your items are located. Instant data, no more clipboards, errors, or backtracking. 4. Access and Share in the Cloud with Insight All captured data automatically syncs to Insight, our secure cloud platform. View, manage, and share your item data anytime, from anywhere—with full visibility across teams and locations.	1. Equip Your Team with iPhone Pro or iPad Pro Devices xPIM+ takes full advantage of advanced camera and LiDAR technology available only on these devices—unlocking automated dimension capture with precision. 2. Download the App The app download is the same as xPIM—just one download for both versions. What unlocks automatic dimensioning is the pricing tier you choose. When xPIM+ is selected, the advanced features are activated on compatible iPhone PRO and iPad PRO devices. 3. Create Your Account Sign up in just a few taps—add your info, or company details, and team members to get started instantly. 4. Start Capturing Data Anywhere Use the app to automatically capture item dimensions, scan barcodes, take photos, and record product details—right at the point of activity. Fast. Accurate. Paper-free. 5. View and Manage Data in Insight, Our Cloud Platform All data is instantly synced to Insight, giving your team real-time visibility and centralized access—no matter the location. Perfect for item master data operational efficiency.	1. Contact your MobileDemand Account Rep or Reach Out to Sales Connect directly with your MobileDemand representative or email our team at sales@mobiledemand.com to get started. 2. Purchase the xDIM System Includes the rugged T1175 tablet and xDIM software—engineered for fast, accurate mobile dimensioning. 3. Create Your Login Once your system is set up, create your user account—or your company organization and additional users—to access xDIM and start capturing data right away. 4. Capture Item Data Anywhere Instantly measure dimensions and collect key product information—right at the point of activity. No manual entry. No fixed station required. 5. View and Manage Data in Insight, Our Cloud Platform All data syncs automatically to Insight, providing a centralized view for your entire team, across departments and locations.

Add on the xScale S200

Portable, Bluetooth scale that pairs with our applications for a seamless, on-the-go workflow and accurate, error-reduced data capture.
